NARRATION

In the beginning, God who didn't look
like some really foreign looking fella
created The Heavens and he created The
Earth. Everything was designed in
absolute perfect harmony + without any
1-part jigsaw piece of the cosmos put
precisely right into position... Such as
a certain flower colour or shadow, or
shade height angle of light or any eye

seen foreseen or timed fly direction it
wouldn't have worked... The moon went
around the earth. The earth in design in
correlation with all the other planets,
big and small suns space dust and
galaxy's the entire universe was good.

REAL TOP CLEVER GENT'S AGENT

Look we've just made a really powerful
telescope plus we can see the edge of
the universe space. Update... We're going
to make a bigger better telescope
because we've found out it's not the
edge of the universe.

GOD

Be content with your earth me lad look
